**Subject:** Materials for March 28 ADEQ EWG Meeting

Executive Work Group Members:

Attached are the materials for the next meeting on **Thursday, March 28, 10:30 am at ADEQ in Room 145**. This is the same room as the last meeting. **Please reply to indicate whether you will be attending in person, on the phone or sending another representative** from your organization.

Materials attached include the following.

- Agenda – includes the WebEx and call-in information
- March 14 Meeting Notes and Evaluation Results– please let me know if you have any changes
- Revised Meeting Schedule and Topics – based on evaluation comments, the topics being presented at each meeting have been revised
- Endangered Species Act Review Memo – the full white paper was sent last week

Below are some ESA questions for your consideration in advance of the meeting.

- Considering the options presented by the technical work group, what option or combination of options would you recommend and why?
- What are your concerns or comments pertaining to each option/combination of options?
- How does ADEQ add value to your organization's processes if we implement one of the proposed options?
- What can ADEQ do to facilitate the proposed options? (e.g. would a liaison help facilitate the section 10 process for project-specific HCPs?)
- Did the technical workgroup miss anything? For example, can you see an additional pathway to comply with the 404(b)(1) guidelines and protect T&E species under the rule while also providing liability coverage for permittees?

Please contact Trevor or I if you need any additional information.

Thanks  
Theresa
